DIRECTOR

SUBMITTED: August 17, 2009

MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Michigan-Wisconsin Boundary Waters Regulations (FO-205)  
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

Discussion and Background:

Currently, ice shanties are required to be removed from all Upper Peninsula waters by midnight on March 31 of each year. This proposal would change that date to March 15 in the Michigan-Wisconsin boundary waters only, which would align the date with Wisconsin boundary water rules. Benefits include improved angler safety due to late season unsafe ice conditions and simplification of regulations for anglers using these waters. The change would also make law enforcement efforts more simple and effective.

Law Enforcement Division is supportive of the earlier shanty removal date. A press release concerning the date change was distributed locally followed by a three week comment period. This resulted in several supportive calls and no opposition.

Another change involves updating the lake sturgeon tag reference which now involves a new lake sturgeon tag available at all retail license vendors. This new tag replaces a plastic locking tag which was only available at a few locations. There is no cost for the lake sturgeon tag and the tag is not a substitute for a fishing license. Anglers will need at least a restricted license to use the tag. Law Enforcement Division is supportive of the new tag. More information about this tag is available online at: [www.michigan.gov/dnrfishing.com](http://www.michigan.gov/dnrfishing.com).
